CareerfIT

CareerfIT

DUAL-SIDED PLATFORM FOR TECH COMPANIES AND JOB SEEKERS WITH AI-DRIVEN RECRUITMENT AND PERSONALIZED UPSKILLING

CareerfIT is a dual-sided platform for job seekers, tech companies and HR agencies. With focus groups, meta-analysis and HR analytics data, we're developing an AI holistic career coach that interprets personality based career assessment and creates careerfIT. Our advanced machine learning algorithms continuously learn from unbiased data: job market trends, hiring outcomes and user feedback, to customize resumes, cover letters, and identify ideal job positions. We precisely match candidates with tech companies, then support their career growth with personalized career development plans.

CareerfIT will fundamentally change how the tech job market works in terms of attracting, retaining and developing talent for tech companies and HR agencies. We're the pioneers in creating AI holistic career coach in the tech employment industry, serving several target groups - individuals (job seekers), (B2C) tech companies (B2B), and HR agencies (B2B2C).
