# AAAxAgents®

AAAXAGENTS® GETS YOUR ENTERPRISE BACK ON TRACK

We have developed a digital data scientist that includes a wide range of functionalities. With our no-code solution, we empower all Snowflake users and enable broad AI adoption across business use cases. Build AI product prototypes for business users by AAAxAgents. Enable accurate and reliable data discovery in natural language, directly generating measurable ROI.

Our strongest differentiation is the methodological core of a hybrid AI architecture that combines symbolic and subsymbolic methods in a closed loop: Data ? Embeddings & Symbolization ? Reasoning with constraints ? validated action or UI ? feedback / continual learning.

The modular "Boxology" for AAAxAgents serves as a reference for agent interfaces, responsibilities, security, and verifiability at an enterprise level.
