ALICE

WE HELP IMPROVE HEART HEALTH BY PROVIDING USERS WITH THE RIGHT INFORMATION AT THE RIGHT TIME. IN DOING SO, WE REDUCE COSTS FOR HEALTH INSURERS AND CREATE THE HEALTHCARE SYSTEM OF THE FUTURE.

ALICE is an innovative mHealth App that aims to support people with heart conditions. While a lot of important information is lost in traditional treatment, we use the data (such as blood pressure and heart rate) securely to best support each user with their treatment.

Our motto is: Show the right data to the right people at the right time.

In this way, we can detect diseases at an early stage, advise patients, educate them, and hopefully save many lives.
