SMART PARKING FROM A SINGLE SOURCE!

Our goal is to make parking digital, smart and simple. We have started with a simple, but industry-leading license plate recognition system, which has become a fully-fledged digital parking management system over the time that can map even complex processes and scenarios.

Our 100% digital Arivo Smart Parking System is fit for the future. A scalable solution that is profitable even for small garages and parking areas, but also suitable for the most complex requirements. This is confirmed by over 90% of satisfied clients in Austria and Germany.
