

ATTA

WE DEVELOP HIGH-TECH SYSTEMS FOR COMMERCIAL MUSHROOM GROWING.

We grow mushrooms with a completely new system. This allows us to produce all kinds of tree mushrooms very inexpensively, location-independent and plastic-free. At the moment, we are concentrating on the still relatively unknown, but really cool Lion's Mane mushroom. For this purpose we are currently building the first plant in Eibiswald. In the first phase, we would like to sell mushrooms ourselves. However, our vision is to enable all farmers to grow mushrooms in an uncomplicated way with a unique business model. In this way, we would like to support Europe's farmers in switching from livestock farming to more sustainable practices.

TEAM ATTA
