

DORSI

DORSI Dynamics

WE'RE CREATING A SMART, PORTABLE WELLNESS DEVICE THAT SUPPORTS BACK HEALTH AND HELPS RELIEVE NONSPECIFIC BACK PAIN THROUGH NATURAL, PERSONALIZED CARE.

DORSI Dynamics is developing an intelligent back care system that uses AI and biofeedback to guide gentle spinal decompression. The connected app tailors each session using real-time inputs like breathing and heart rate variability.

Our vision is to make back wellness simple, effective, and accessible—anytime, anywhere.
