the next level of education

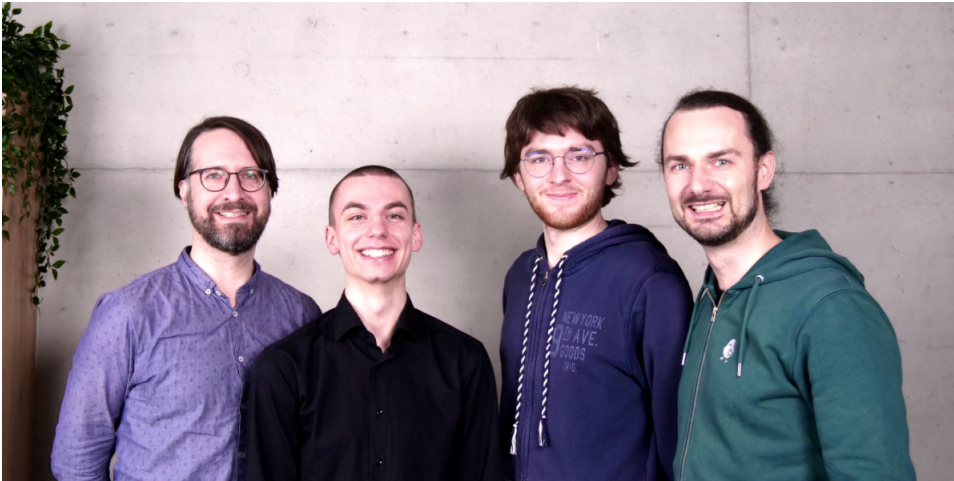

# edventure Studios

EDVENTURE STUDIOS MAKES MATH AN ADVENTURE — COMBINING PLAYFUL ONLINE TUTORING, INTERACTIVE QUIZZES, AND STORY-DRIVEN LEARNING GAMES TO HELP STUDENTS UNDERSTAND, REMEMBER, AND ENJOY MATHEMATICS.

edventure Studios is developing Konomondo, a smartphone-first mathematics learning platform that combines playful practice, AI-supported guidance, and flexible on-demand tutoring. In a motivating game world, learners aged 13+ close individual knowledge gaps through daily exercises, mini-games, and visible progress, while tutors provide targeted support whenever needed. Our goal is to make high-quality mathematics support more affordable, personal, and motivating than traditional tutoring.

As a certified social enterprise from Graz, edventure Studios combines didactics, game development, and digital scalability to improve educational opportunities and turn mathematics from a source of anxiety into a rewarding learning experience.
