AI-BASED APP FOR AUTOMATED FACT-CHECKING

Factinsect is a software based on artificial intelligence for automated fact-checking that helps to assess the credibility of information from the Internet. Factinsect supports readers with a simple traffic light system to better evaluate the overwhelming flood of information on the Internet. Green stands for: confirmed information or established knowledge. Orange means: The information cannot be confirmed yet. The reason for this can be that the information is new, that there are contradicting assessments concerning its credibility, that it is a mistake or satire.

In this case it is up to the reader to delve deeper into the topic. The software is available as a test version as a plug-in for Chrome browser. Further functions, supported browsers, mobile applications and video check are in development.

## Worldwide coronavirus cases surpass 4 million

BY CAROLINE LINTON UPDATED ON: MAY 9, 2020 / 8:13 PM

The number of confirmed cases of the coronavirus has surpassed 4 million on Saturday, according to the World Health Organization. The numbers come nearly a week after the World Health Organization declared the coronavirus a global pandemic when there were 118,000 confirmed cases.

The worldwide death toll topped 277,000 on Saturday, with the United States recording more than 78,000 deaths in the world.
