

Factinsect

AI-BASED APP FOR AUTOMATED FACT-CHECKING

Factinsect is a software based on artificial intelligence for automated fact-checking that helps to assess the credibility of information from the Internet. Factinsect supports readers with a simple traffic light system to better evaluate the overwhelming flood of information on the Internet. Green stands for: confirmed information or established knowledge. Orange means: The information cannot be confirmed yet. The reason for this can be that the information is new, that there are contradicting assessments concerning its credibility, that it is a mistake or satire.

In this case it is up to the reader to delve deeper into the topic. The software is available as a test version as a plug-in for Chrome browser. Further functions, supported browsers, mobile applications and video check are in development.

Worldwide coronavirus cases reach 4 million

BY CAROLINE LINTON UPDATED ON: MAY 9, 2020 / 8:13 PM

The number of confirmed cases of the coronavirus has surpassed 4 million on Saturday, according to the World Health Organization. The numbers come nearly a week after the World Health Organization declared the coronavirus a global pandemic when there were 118,000 confirmed cases in the world.

The worldwide death toll topped 277,000 on Saturday, with the United States recording more than 78,000 deaths in the world.
