

## FertiLine

FERTILINE IS THE FIRST DIGITAL PLATFORM THAT COMBINES CERTIFIED AT-HOME FERTILITY DIAGNOSTICS WITH REAL MEDICAL COACHING — EMPOWERING COUPLES TO TAKE CONTROL OF THEIR FERTILITY EARLY AND EFFECTIVELY.

FertiLine is a digital platform that empowers individuals and couples to take early, informed action on fertility — from the comfort of home and with medical guidance. The project combines certified at-home diagnostics, lifestyle and cycle tracking, and personalized support from experienced physicians specialized in reproductive health. Instead of waiting years for answers, users gain clarity within weeks and receive tailored, evidence-based recommendations.

FertiLine helps detect fertility issues early, engages all genders, and reduces unnecessary stress, travel, and delays. By digitizing diagnostics and medical coaching, we provide an inclusive, preventive, and scalable solution for modern reproductive care.
