

Golden Mind

GOLDEN MIND ENABLES COMPANIES TO MEASURABLY INCREASE THE PERFORMANCE OF THEIR EMPLOYEES.

Golden Mind offers personal online training to promote health in the B2B sector. The training consists of e-learning sessions, the training area and online 1:1 coaching sessions.

Our goal is to work with people to help them create an enhanced mindset and to guide them on the path to their health goals. Various trainings were designed with specific focus areas.

We are personally available for your employees in 1:1 coaching (online | on-site) and increase their employee satisfaction. Through specific training and ongoing reflection, you will achieve your ambitious goals.

We started to develop our idea in 2021. A pilot project has already been carried out and the first clients are using Golden Mind. Currently, the next development steps are being planned to reach our technology goal. We will implement features to make our solution smarter, more customized and more effective for our customers.

Viktoria Zinner, founder of Golden Mind, has formed a great team to bring Golden Mind up to the next level.
