

HIGH+SENSOR

HIGHSENSOR

EMPOWER FOOD PRODUCERS TO TAKE CONTROL OF THEIR PROCESSES — THROUGH EASY-TO-IMPLEMENT AI-BASED SENSOR SYSTEMS, PROVIDING REAL-TIME INSIGHTS INTO QUALITY AND EFFICIENCY WITHOUT THE NEED FOR EXTERNAL EXPERTS.

HIGHSENSOR develops AI-based sensor systems that make industrial food inspection faster, easier and more accessible. The systems combine proven hardware components such as cameras, lighting and edge computers with a guided software platform. The software supports the complete workflow from image acquisition and image sorting to model creation, deployment and real-time inspection. The main benefit for customers is that inspection tasks can be implemented with significantly less expert effort and in a much shorter time.
