Lagerless

Lagerless

LAGERLESS CONNECTS PEOPLE WITH EXTRA SPACE TO THOSE WHO NEED IT - LIKE AIRBNB, BUT FOR STORAGE AND PARKING.

Lagerless is a peer-to-peer platform that connects people who have unused space — like garages, basements, or driveways — with those who need affordable storage or parking. Think of it as the Airbnb for storage. Users can easily find, book, and manage short-term space rentals in their neighborhood.

Property owners earn extra income, while renters get flexible, local, and budget-friendly alternatives to traditional storage. Lagerless supports the sharing economy, reduces wasted space, and helps meet the growing demand for urban storage — especially during life changes like moving, travel, or downsizing. The project is currently under development in Austria and aims to expand across Europe.
