OUR TECHNOLOGY TAKES CYCLISTS TO A NEW LEVEL OF PERFORMANCE: BUILD THE CONFIDENCE YOU DESERVE TO SUCCEED IN YOUR NEXT RACE!

Training is the most important aspect for a competing cyclist. Good training makes the difference between successful and average athletes. Our technology helps cyclists make a further step towards success. By continuously monitoring the power a cyclist develops, we estimate the effectiveness of the training and tell the cyclist which phases of the training call for improvement. The optimal performance profile our technology can outline, plays a relevant role during races for boosting the pace at its highest.

We believe in great performance. Our technology does too.
