

Norganoid

NORGANOID DEVELOPS THE NANO-LAB-ON-A-CHIP, AN ADVANCED ORGAN-ON-CHIP DEVICE SPECIFICALLY DESIGNED FOR DISCOVERING AND DEVELOPING DRUGS TO TREAT NEUROLOGICAL DISORDERS.

NORGANOID provides a pioneering organ-on-a-chip platform, enabling accelerated drug screening and development. The state-of-the-art technologies of stem cell research, microfluidics and nanotechnology are combined in the Nano-Lab-On-A-Chip system that helps to drastically reduce time and costs associated with medical and pharmaceutical research.
