ontours

ONTOURS™ INCLUSIVE IS A MOBILE APP THAT EMPOWERS BLIND AND VISUALLY IMPAIRED PEOPLE TO NAVIGATE CITIES MORE INTUITIVELY, INDEPENDENTLY, AND ON THEIR OWN TERMS.

ontours™ inclusive is a mobile app that helps blind and visually impaired people move through cities independently, intuitively, and in tune with their individual needs. With acoustic navigation, real-time public transport data, and a screen reader-friendly interface, it enables safe and accessible urban mobility without relying on visual input.

The app is developed hand in hand with the community to ensure it fits real-life situations and empowers users in their daily routines. After a successful prototype phase, we are now building a market-ready MVP.

Our goal is to offer the app free of charge to users via partners like social insurance providers—reducing the need for assistance services while supporting inclusive, people-centered city development.
