

Opus Novo

OUR VISION IS, TO ENABLE ELDERLY CARE PATIENTS THE ABILITY TO SUSTAIN THEIR INDEPENDENCE FOR LONGER AND TO RELIEVE AND SUPPORT CAREGIVERS BY SELLING OUR PRODUCT ELLY

We are manufacturer of the digital care assistant "ELLY", which is a multifunctional luminaire for elderly people and their caregivers. An individually adjustable orientation light makes people's nocturnal ways safer and gives them more orientation during the night. Furthermore, ELLY sends the bed exit signal to the caregiver by communicating with an app and thereby relieves relatives and caregivers massively. For later product versions an intercom function as well as other features are planned. The product is suitable for applications in home care, whereby relatives and caregivers can buy or rent our product.
