

REELOQ

WE REVOLUTIONIZE ON-THE-GO SMARTPHONE USE WITH OUR INNOVATIVE RETRACTABLE SECURING SYSTEM.

Reeloq developed secure smartphone attachment solutions for outdoor activities and industrial use. Their flagship product, the Reeloq System, is an innovative phone holder with a retractable mechanism that prevents smartphones from falling during activities like hiking, climbing, or working at heights.

The system combines a retractable cord, one-handed operation, and a durable, weather-resistant design. It is designed for adventurers, content creators, and professionals in fields like construction or maintenance who need quick and safe access to their phones.

Reeloq's mission is to make using smartphones on the go safer, more convenient, and more efficient.
