REMEA. POWERFUL CLOUD PLATFORM DESIGNED TO OVERVIEW, MANAGE AND BILL YOUR ELECTRIC VEHICLE CHARGING STATIONS

EV charging holds immense potential for the future, constantly evolving and offering new business opportunities through innovative technology. REMEA, an EV startup, is introducing a specialized platform that enables electrical installation companies to offer small and medium businesses SMBs solutions to easily provide EV charging services to end customers EV- drivers. Businesses can leverage EV charging to attract new customers and boost revenue. With Remea's platform, anyone with a good location can install an EV charger and offer charging services to the market.

To enter new markets, Remea partners with electrical charger installation companies. We are enabling them to offer turnkey lifestyle EV charging to their clients. Electrical installation companies enable SMBs to operate charging services and bring convenience to EV drivers who can start charging swiftly without cards or registrations, offering them support and maintenance. We want to create value for all stakeholders in business EV charging and believe that the system of revenue charging creates added value for the whole toolchain and ensures that the final user gets the best EV charging service possible.

Our agile Remea platform quickly adapts to the dynamic EV charging market. Its cloud-based, modular software architecture efficiently manages, monitors, and bills EV charging stations, providing unique features for all stakeholders in the ever-evolving charging market.

## USP

Web based EV B2B Charging solution with the simplest use for driver and business owner without fixed subscription.

Target market: EU

Space connection

We will use Copernicus weather data in order to optimize the EV chargers that we are managing.
