

UnravelTEC

UNRAVELTEC IS DEVELOPING SENSOR SOLUTIONS FOR HOME AND OFFICE USE.

As human beings, we have a large number of senses. However, our surroundings hold much information we simply cannot sense.

Imagine if you could smell dangerous gases like CO, see radiation like Wi-Fi or feel what the things you touch are made of. We would behave very differently and could profit from these, so far hidden realities.

Henri – hidden reality instrument that enables you to see, hear, smell and detect everything you are not yet able to do with human senses.
